

## Gentle Jewellery Cleaning Kit

*This product is especially formulated to clean gold and silver jewellery, including all types of delicate and porous gemstones, as well as pearls.*

Directions: Immerse jewellery in cleanser for two minutes. Use the included brush to gently loosen any stubborn dirt in crevices of your Onefooter. Rinse & dry. Follow up with polishing cloth. To clean strands, dampen a soft cloth with solution and wipe pearls.

---

Our Gentle Jewelry Cleaner is safe to use on a wide array of jewellery, from beads and sterling silver to gold, gemstones, delicate pearls, opals, and unique fashion jewelry. This ammonia-free cleaner can be safely used on porous stones, soft stones, enamel and treated gemstones to keep jewellery sparkling like new

The cleaner is an effective, surfactant-based formula, especially designed for delicate pieces. Unlike other jewellery 'dips', ours has a lovely gardenia scent. A dipping basket and touch-up brush are included in your kit.

This kit contains a polishing cloth, which is designed to clean and polish the finest gold, silver and platinum jewelry. The non-rouge inner cloth is treated with a trade-secret formula to remove tarnish and discolouration and to restore lustre without scratching or removing the finish; buffing with the 100 percent cotton outer cloth provides a gleaming lustre.

Follow the dipping and rinsing in the gentle jewellery cleaning formula with a touch-up polish with this cloth. Alternatively, our cloths can also be used alone. They are perfect for travel.

Keep this and all chemicals out of the reach of children. Contains sulphates.
